

In the drawings:

Applicant submits the accompanying replacement sheet of the drawings to correct figure 1. Specifically, the reference numeral identifying the backlight in figure 1 has been corrected to be reference numeral 27.

REMARKS

This amendment is submitted following the Final Office Action dated June 1, 2006.

In response to the drawing objections, applicant submits a replacement sheet correcting the reference numeral in figure 1 that identifies the backlight. The backlight is now designated as reference character "27". The specification has been amended to now identify the backlight as "27."

During a telephone conference between applicant's attorney Robert M. Downey and Examiner Anabel M. Ton on June 7, 2006, it was agreed that the above amendments to the claims were sufficient to patentably distinguish Applicant's invention over the prior art references of record.

Specifically, Applicant has amended claims 21, 28 and 32 to more specifically define the light emitting source as being "structured and disposed to direct light onto the sheet substrate." Additionally, claim 28 has been amended to correctly define the location of the backlight device as being on the bottom side of the cover panel.

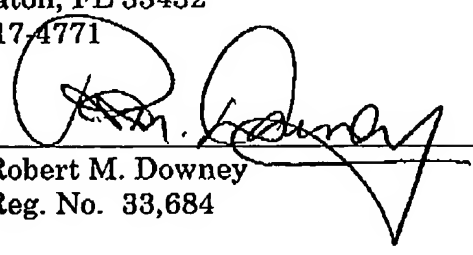

The Examiner has indicated that the above amendments will place the claims in condition for allowance. Accordingly, it is respectfully submitted that the above amendments to the claims be entered after final action in an effort to place this application in condition for allowance.

Should any further action be necessary, the Examiner is respectfully urged to contact Applicant's attorney by telephone within the three month shortened statutory from the mailing date of the Final Office Action.

Respectfully submitted,

ROBERT M. DOWNEY, PA.
